

## European platform Care & industry together against CORONA

The [Enterprise Europe Network Flanders](#) in cooperation with **Flanders' Care** created a 'European Platform - Care & Industry together against CORONA'. The goal of the platform is to match the different needs of the healthcare sector and the offers of our companies and researchers. It also reserves place for governments to publish online all their relevant information links (via the marketplace item Service). We will use the B2Match as a central platform and use the strength of the E.E.N. members to gather all this.

The current COVID-19 crisis activated worldwide many initiatives to support and help those who are in need mostly fragmented on a regional scale. Nevertheless we all are facing the same challenges and are looking for solutions in order to support the entire healthcare sector.

At the same time we have to prepare the necessary support following the outbreak. The proposals on this platform can be supportive for this phase to. The 'Care & Industry together against CORONA' platform aims to bring together all the different actors in Europe to:

- match offers and requests
- share knowledges and approaches
- give an overview of tailor-made support in your own region
- ...

At 'Care & Industry together against CORONA', we offer the opportunity to make targeted and time-efficient contacts with all actors in healthcare, industry, academia and government. By means of an online platform, interested parties can present their profile.
