Promote Trade & Investment between Slovenia and Cameroon

3RD CENTRAL AFRICA DIGITAL FAIR CONFERENCE In Yaoundé Cameroon.

From: 23rd – 25th October 2024

Theme: *“Digital Sovereignty in Central Africa in the era of Artificial Intelligence”*

Slovenia Cameroon Business Club invites distinguished EU and international delegates to the 3rd "Digital fair conference in Central Africa in the AI Era" in Yaounde, Cameroon from **23rd - 25th of October 2024**.

CADIF, (CENTRAL AFRICA DIGITAL FAIR), the largest High-Tech exhibition in Central Africa. An annual gathering in the digital world where experts, innovators, investors, business leaders, government officials, and other institutions from the region and Africa in general come together to discuss the new perspectives of the digital era and the integration of the sub-region into the digital world.

CADIF, offers a unique platform for businesses, individuals or academics involved in the areas of digital transformation, Artificial intelligence smart learning Industry 4.0, Blockchain and other related. Addressing the multifaceted challenges associated with digital sovereignty in the region, the conference will focus on key aspects, including infrastructure, regulations, data security, and intellectual property. Delving into these critical dimensions, the conference will explore and discuss the measures necessary to fortify digital sovereignty in Central Africa, assessing their potential impacts on economic and social development.

In highlighting the landscape of technology **CADIF** offers a unique opportunity to present the latest trends in emerging technologies, including artificial intelligence, the internet of things, and blockchain. The aim is to unveil the myriad opportunities that these cutting-edge technologies offer for development in Central Africa, with a specific emphasis on pivotal sectors such as health, education, and agriculture. Emphasize the merits and necessity of the implementation of 5G technology which is fundamental for the optimal development of Artificial Intelligence and its cohort of applications.

Whether you are a policy maker, academic, industry leader, a woman in tech, or tech driven innovator immersed in the AI universe, we welcome diverse European and international voices to join us in building partnership opportunities that drive technology for good. Share your expertise in AI governance, data privacy, blockchain policy and other emerging technologies with Central African leaders and stakeholders.

We invite international experts to be keynote speakers at the 3rd Central Africa Digital Fair conference that will take place in Yaounde, Cameroon from **23rd - 25th of October 2024**. Let your experience and knowledge guide Africa's digital future. Confirm your speaking role today! Lead sessions on your tech expertise and exchange best practices with African innovators.

Potential business opportunities,

- ❖ Agricultural Technology (AgriTech)
